Comments:

In what ways was the teaching fellow most effective? Why?

Comments
Ashutosh is amazing. Super accessible in and outside class, able to break down concepts easily, he will be a great professor someday, if he so chooses.
Very humble. He explained the content to the best of his ability and was always honest when he did not know something.
well-explained and super helpful, I propose he is the best TA
Whenever I needed help, Ashutosh was there with clear explanations and a warm smile!
Ashutosh has always been very accessible inside and outside the classroom. I really appreciate his patience in dealing with the barrage of questions we would have for him.
Ashutosh clearly presented the course content and made sure to get back to us if he didn't know something.
Ashutosh was always open to students joining him in Gutman and asking questions He was willing to give feedback on job applications and brainstorm career moves. He had a good grasp of the material and was open about when he was learning something alongside us.
I chose to give feedback to this TF because he is the second of the two TFs that made this amazing. The support and encouragement was just what I needed, and the understanding nature and kind ear to listen to me when I was struggling was one of the best teaching experiences I've had.
Ashutosh was extremely kind and created a warm learning environment. I appreciated his willingness to go over concepts or stay after section. Ashutosh and Alex made a terrific teaching team! Thank you!
Ashutosh is great with pacing a section and really helps us to reach understanding at a pace that is appropriate for us.
Ashutosh is the kindest and most available TF! I see him at Gutman most of the time, and he makes sure to be there for students anytime!
Ashutosh was so generous with his time. He would sit in Gutman doing work in the afternoons and students would come up to him to ask questions. Even though he was definitely not on duty, he always enthusiastically answered questions and provided feedback.

What recommendations would you make to the teaching fellow to strengthen their teaching and/or make the course more valuable?

Comments
Maybe slow down a little bit during section, provide more checks for understanding, more time for students to ask questions, etc.
Better slides maybe? Felt like there was too much content on each slide
N/A
NA
Make office hours longer than 10' slots
He seems less familiar with the subject matter (compared specifically to Alex), and sometimes provides a response that he isn't as sure about which can be misleading.
Not much to say, great job Ashutosh! You will be missed!
